INDIA SUGAR BALANCE SHEET: LOWER PRODUCTION EXPECTED IN ONGOING SUGAR SEASON

Source: ISMA

*sugar diversion to ethanol production in million tonnes

Note: Opening stock for SS 2022-23 revised as per GOI numbers

INDUSTRY UPDATES

- On January 18, 2024, the Government of Uttar Pradesh revised the State Advised Price (SAP) of sugarcane for Sugar Season 2023-24 by ₹20 per quintal across all categories
- On December 15, 2023, Department of Food and Public Distribution (DFPD) issued directions that in view of lower expected sugar production in the country (wherein the major drop is mainly from Maharashtra & Karnataka), the sugar industry to restrict the sugar sacrificed through the B-heavy & Sugarcane Juice/Syrup route for ethanol to 1.7 million tonnes vs 3.8 million tonnes in previous season

GLOBAL SUGAR PRICES ROBUST

- Global Sugar Balance Sheet pointing to surplus: International reports now forecasts a global sugar surplus in SS 2024-25, largely driven by record sugar production in Brazil offsetting lower production in India and Thailand.
- Record Sugar Output expected in Brazil: Sugar output from Brazil's top producing centre south (CS) region is estimated at a record 43.1 million tonnes in the 2024-25 season despite lower supplies of sugarcane, based on international reports. Sugar output from Brazil's main CS region is likely to go up as mills plan to prioritise the production of sugar over ethanol.
- International sugar prices robust: As on March 1, 2024 the NY #11 front month contract was trading at US 21.3 cents/lb. London #5 prices are currently trading at \$602.4 per tonne.

OUR ALCOHOL BUSINESS STRENGTHS

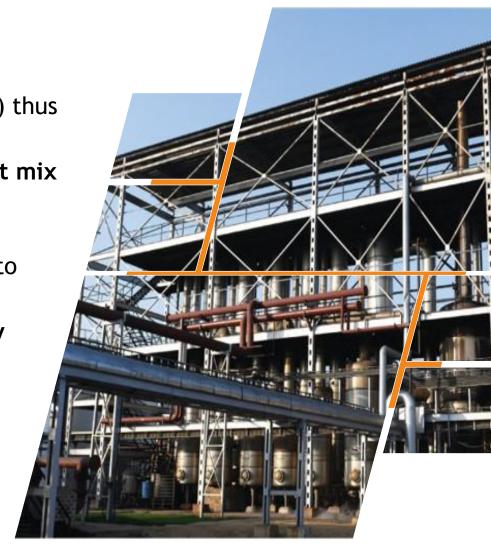

• Integrated operations provides assurance of feedstocks (molasses, syrup) for distillery operations and fuel for manufacturing (bagasse) thus ensuring full capacity utilization to maximize production

• Flexibility of both feedstock (grain/sugarcane based) and product mix (ethanol/ENA/Rectified Spirit, etc.) to optimize production and profitability based on economics

• **High operational efficiencies with continuous focus** on the same to further improve recoveries and reduce supplementary fuel

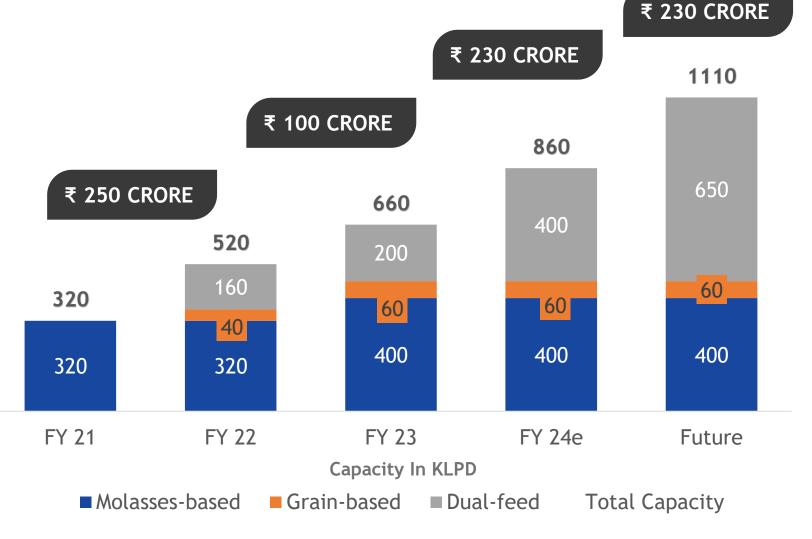

- High adherence to Environment, Health, Safety and Sustainability standards
- Modern & Efficient Technology employed to achieve Zero Liquid Discharge (ZLD)
- High-quality by-products contributing substantial income

TIMELY AND EFFICIENT INVESTMENTS TOWARDS DISTILLATION CAPACITIES

- Triveni has been at the forefront of setting up distillation capacities in a timely and efficient manner
- Short timeframe in setting up large scale distilleries utilizing the entire range of established feedstocks - a key strength
- Considering present Government policy and challenges in availability of permitted grains at viable procurement costs for distillery operations, decided to keep the implementation of the new proposed distillery expansion project at Sabitgarh, U.P. in abeyance

OUR ALCOHOL BUSINESS INITIATIVES

Our ongoing initiatives in Alcohol business

Overall capacity will be further expanded through new multi-feed distillery in Rani Nangal. New distillery at Sabitgarh on hold in view of present Government policy & challenges

Focus on maximising production with different feedstocks be it grain-based or sugarcane-based

Enhancing various value adding propositions through sale of DDGS, potashrich ash, CO2 Enhancement of sugarcane availability:
Higher sugarcane crush will boost
availability of sugarcane derived
feedstock for distillery operations

How we maximised Alcohol potential in FY 23

Scaled up our distillation capacities to 660 KLPD to meet the increased demand for ethanol and meet our production targets for FY 23

Enhanced potential for using grain as feedstock through a dedicated grain facility and a multi-feed distillery

MNP distillery unit was commissioned in time, leading to 100% capacity ramp-up

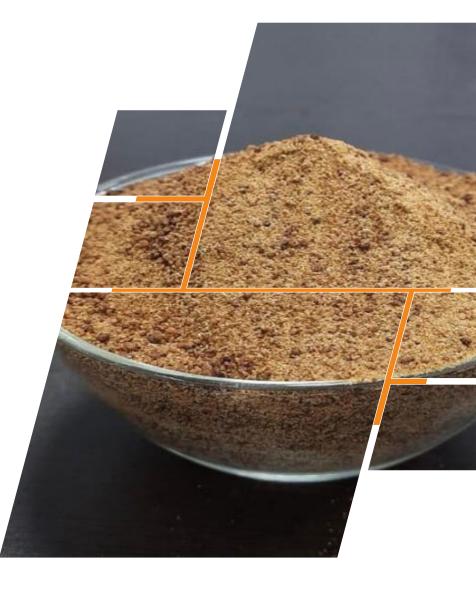

On time commissioning of the MZN grain distillery, helping to leverage the product flexibility to produce Ethanol as well as superior quality ENA, which was supplied to IMFL manufacturers across U.P. and also utilised for captive consumption

OUR VALUE ADDED PROPOSITION: DISTILLERS DRIED GRAIN SOLUBLES (DDGS)

Facilities at Milak Narayanpur & Muzaffarnagar to help us enhance our value proposition through their partial/full operations on grains

- The by-product of grain-based operations, DDGS, is a protein rich product derived from grains after converting starch in fermentation with yeast to produce Ethanol. This is sold to premium institutions and has been well accepted in market.
- It provides a good amount of protein, fibres and other nutrients, and is a food supplement for poultry, cattle feed, livestock, aquatic products, etc.
- With no branded DDGS currently in the market, the potential for boosting our revenues and enabling profitability with high quality DDGS
- Income from DDGS as a by-product provides significant offset of conversion cost

OUR VALUE ADDED PROPOSITION: POTASH-RICH ASH

- The process of conversion of molasses to ethanol generates spent wash (an effluent) which upon concentration is called Slop, further used as fuel in the Incineration boilers which leads to fly ash generation which is rich in potash
- We supply this potash-rich ash for additional revenues, wherein the customer converts the same to produce Potash derived from Molasses (PDM) and sells as potassic fertilizer as per Fertilizer Control Order.

OUR VALUE ADDED PROPOSITION: CO₂

- In the fermentation process of alcohol manufacturing, carbon dioxide is generated as a by-product. This carbon dioxide can be captured, purified, liquified and put into cylinders or converted into dry ice.
- The Company has a carbon dioxide capturing unit at its
 Sabitgarh distillery on a Build Own Operate (BOO) basis for
 which we are paid for the raw carbon dioxide to earn additional
 revenues. Exploring the possibilities of installing 2 more plants
 in units
- This is an initiative towards Environment, reduction of emission of Green House Gases (GHG). New opportunities on carbon sequestration by capturing CO₂ and storing / injecting underground for mineral value are also being explored

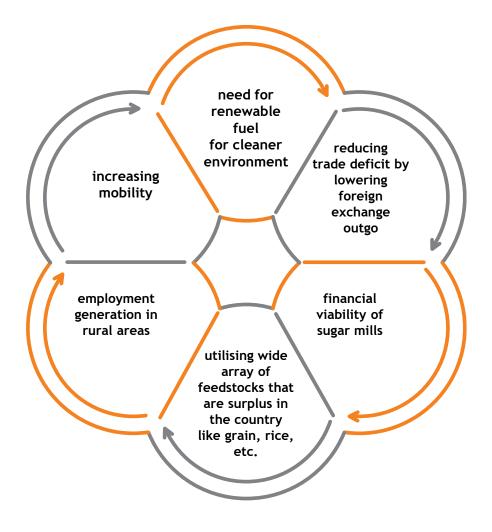

ALCOHOL SEGMENT DRIVEN BY ETHANOL DEMAND

- Government actively promoting the production and blending of bio-ethanol with petrol, and has targeted 20% blending under Ethanol Blended Petrol (EBP) Programme by 2025 or EBP20
- To achieve the target of 20% blending by 2025,
 ~1,000+ crore litres of ethanol will be required.
 With ~300+ crore litres for other usage, there is need to create capacity of ~1,700 crore litres,
 assuming plants operate at 80% efficiency.*

Ethanol Demand Drivers

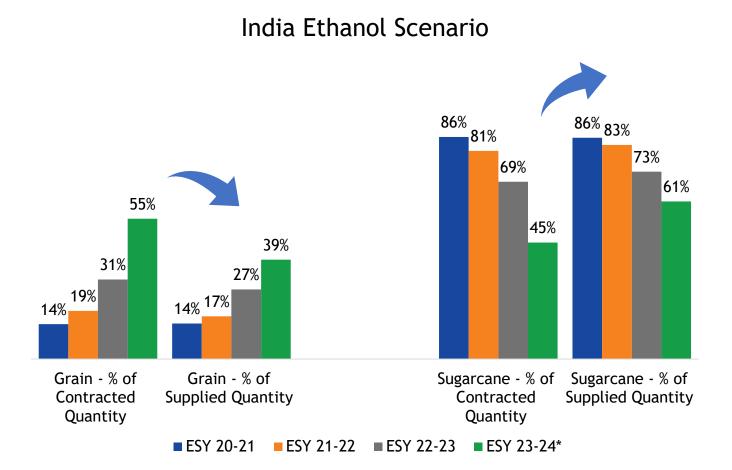

^{*} Source: May 2023 comments from Food and Consumer Affairs Ministry

SUGARCANE - THE MAINSTAY OF THE ETHANOL BLENDING PROGRAMME

- Ethanol from sugarcane route has dominated and contributed to higher percentage in terms of supplied quantities as compared to contracted quantities.
- We believe sugarcane will remain the major contributor to the production of ethanol under EBP20.
- Triveni: Sale of alcohol produced from grain commenced in FY 23 and accounted for 25% and 33% of total sales volumes in FY 23 and 9M FY 24, with the balance from sugarcanebased feedstocks

Note: *Total Contracted includes LOI for Q1 & Q2; ESY 23-24 supply till February 18, 2024

INDUSTRY UPDATES

FIGURERING & INDUSTRIES LTD.

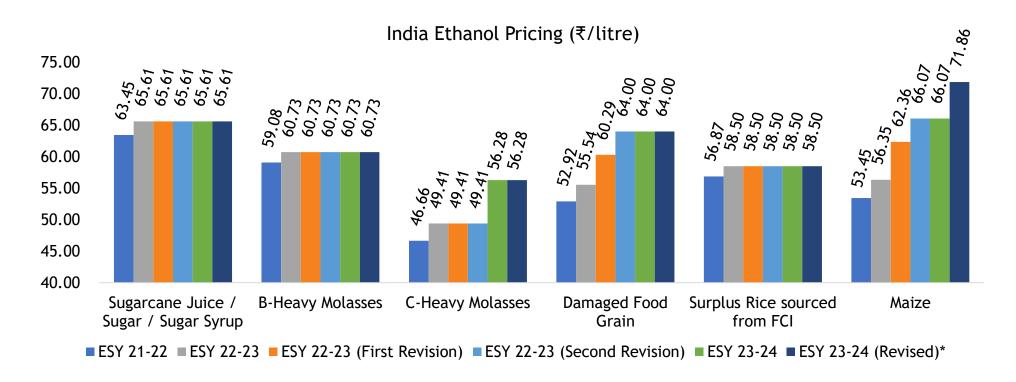

- On December 15, 2023, Department of Food and Public Distribution (DFPD) issued directions that in view of lower expected sugar production in the country (wherein the major drop is mainly from Maharashtra & Karnataka), the sugar industry to restrict the sugar sacrificed through the Bheavy & Sugarcane Juice/Syrup route for ethanol to 1.7 million tonnes vs 3.8 million tonnes in previous season (only 71% of offers for Bheavy ethanol to Oil Marketing Companies from distillery will be allocated and 29% for Sugarcane Juice (with an option of additional 18% of offered quantity from Bheavy route)
- OMCs announced an incentive of ₹ 5.79/litre for maize-based ethanol w.e.f. January 5, 2024. Previously the price of C-heavy based ethanol was increased to ₹ 56.28/litre through an incentive of ₹ 6.87/litre for ESY 2023-24.

CONTINUED ETHANOL PRICING IMPROVEMENTS

- Government has been incentivizing the industry through supportive ethanol prices under the EBP Programme
- Recently, prices have been revised for ethanol produced from Maize and C-heavy molasses for ESY 2023-24

Note: Ethanol Supply Year (ESY) has also been redefined as a period of ethanol supply from 1st November of a year to 31st October of next year from 1st November 2023 onwards. In view of the above change in ESY period, the ESY 22-23 period will be considered from 1st December 2022 to 31st October 2023 i.e. 11 months
